Art Unit: 2653

1) Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12 and 18-26 , drawn to method of recording on medium including setting first, last, and multiple pulse train power levels , classified in class 369, subclass 59.11.
- II. Claims 13-17, drawn to apparatus for recording on medium including NRZI pulse generator with read, peak, bias control signals selected dependent on correlation and laser diode driver with 3 power level settings, classified in class 369, subclass 47.51

2) The inventions are distinct, each from the other because of the following reasons:

3) Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case , the process as claimed can be practiced by another materially different apparatus not including the many control signals, correlation, and power level settings structure.

4) Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
